

Tip for : GO-E

We recommends the following configuration tips when you try to configure the Smartmaster Pro with a GO-E charger.

- 1 On the back of the reset card, you'll find the Serial number of your go-e Charger.
- 2 Tap the tab "Internet" at the bottom, then click on OCPP in the menu : Activate the "OCPP 1.6 field.
- 3 change OCPP server URL to `ws://{SMARTMASTER_IP_ADDR}:8834/ocpp`
- 4 Activate the local HTTP API V2 into advanced settings.
- 5 Activate : Allow local Modbus TCP API into advanced settings.
